DoIT Academic Technology

DoIT Academic Technology, a department within the Division of Information Technology (DoIT), works with faculty, staff, students and partners to offer a variety of services that support UW-Madison’s mission and strategic priorities as well as the Wisconsin Idea.

Learn@UW-Madison
The service provides administration, customer support and consulting for Learn@UW, the suite of evolving teaching and learning technologies that enable the creation of effective learning environments. The team also helps integrate tools into the larger campus digital ecosystem and contributes technical and strategic expertise to a variety of university initiatives, committees and partnerships.

Teaching & Research Application Development
The Teaching & Research Application Development (TRAD) service partners with instructors, researchers and staff to conceptualize, design and implement innovative custom software solutions. We specialize in supporting teaching, learning and research ideas and in providing technical expertise for a variety of university teaching and learning initiatives.

My UW-Madison Academic Application Development
The service works with instructors, advisors, researchers and other partners to design, implement and support innovative solutions in My UW-Madison, the hub of our online community.

Learning Analytics Center of Excellence
Dedicated to collaboration across the university, the Learning Analytics Center of Excellence (LACE) team provides expertise on leveraging data to empower educational practices affecting the student experience and academic success.

Software Training for Students
Our trainers help students achieve academic and professional success by teaching technology skills through group workshops, 1-on-1 support and online training. We also work with instructors to design and deliver custom workshops as part of the curriculum.

Information Technology Academy
The Information Technology Academy (ITA) serves precollege students in the communities of Madison, Oneida and Lac du Flambeau. In alignment with the UW-Madison’s Diversity Framework, ITA aims to enhance diversity at UW-Madison and in the IT profession by increasing access to technology, enhancing educational opportunities and providing leadership development for diverse students.
